

Astrostik Self Adhesive Joining Tape 3m

£8.99

Product Images

Description

The new Astrostik joining tape allows quick speedy jointing of artificial grass rolls. Without the mess of glues and backing tapes it can be used indoor or outdoor to create instant seams.

Comes in rolls of 3m length x 15cm wide. Now there is no need to buy backing tape and separate adhesive, just unroll and press the edges of the grass on to the tape. Works great on decking, rooftops and patios as well as sand/soil bases
