Description

Ultraflex Adhesive is a two component polyurethane based adhesive system primarily designed for bonding artificial grass or outdoor carpet directly to a rubber shockpad, concrete or tarmacadam base. Alternatively, it is suitable for bonding prefabricated rubber shockpad directly to a sub base of concrete or tarmacadam. 2 part mix, needs mixing well with our adhesive mixing paddle (shown below)

- ✔ **Designed for bonding artificial grass, outdoor carpets directly to a rubber shockpad or tarmacadam/concrete base**
- ✔ **For bonding rubber or textile shockpad directly to a sub base of concrete/tarmacadam**
- ✔ **Beads or trowels easily onto sub surface.**
- ✔ **Flexible bondline avoids hard glue line under the surface**
- ✔ **Packaging: 11kg + 1.2kg Hardener**
